

EMS IMPLEMENTATION – 2 DAY DURATION

COURSE OBJECTIVES

To give delegates a sound understanding of Environmental Management Systems and a methodology for their implementation.

BENEFITS

Anyone faced with the task of developing and implementing an Environmental Management System for the first time will need some help. This interactive course gives delegates an understanding of the requirements of ISO 14001 and EMAS so that they will be able to carry out an initial preliminary review and begin to appreciate environmental impacts and effects as they apply to their own organisation.

It goes on to demonstrate and practice a range of techniques for the development and implementation of an EMS in their organisation. Taking them to the point where they can apply for external certification to ISO 14001. It also provides a unique opportunity to discuss their own requirements with an environmental management professional.

WHO SHOULD ATTEND?

All those with an interest in environmental issues and who seek to implement a management system to manage those issues in an efficient and cost effective way.

IN-HOUSE COURSES

The course can be tailored to meet your organisations needs and be held on your premises or at a venue of your choice.

THE COURSE INCLUDES

- Introduction to Environmental Management Systems (ISO 14001 and EMAS)
- Reviewing environmental aspects and impacts
- Performing an environmental review
- Producing an environmental policy
- Understanding regulatory and legislative issues
- Producing an action plan containing objectives and targets
- Developing and implementing an EMS

CONTINUING PROFESSIONAL DEVELOPMENT (CPD Points)

Completion of this course will qualify for 14 CPD Points.

CERTIFICATION

All delegates will be awarded a certificate verifying attendance and completion of the course.
